My dear Prof. Houben;

I have but recently seen the English edition of your revealing "Call of the North". It is a wonderful book, the best of its kind to the present. You have given the scientific data and the woman's spirit with a splendid fidelity. As to your treatment of my part of the old struggle - this deserves my heart felt gratitude. I would like to see this splendid book issued by an American publisher. Have you made an effort to reach this market?

If I can be of any service to you. Command me.

Cardially,

Fredrick A. Cook
